

Proper Shoe Sizing

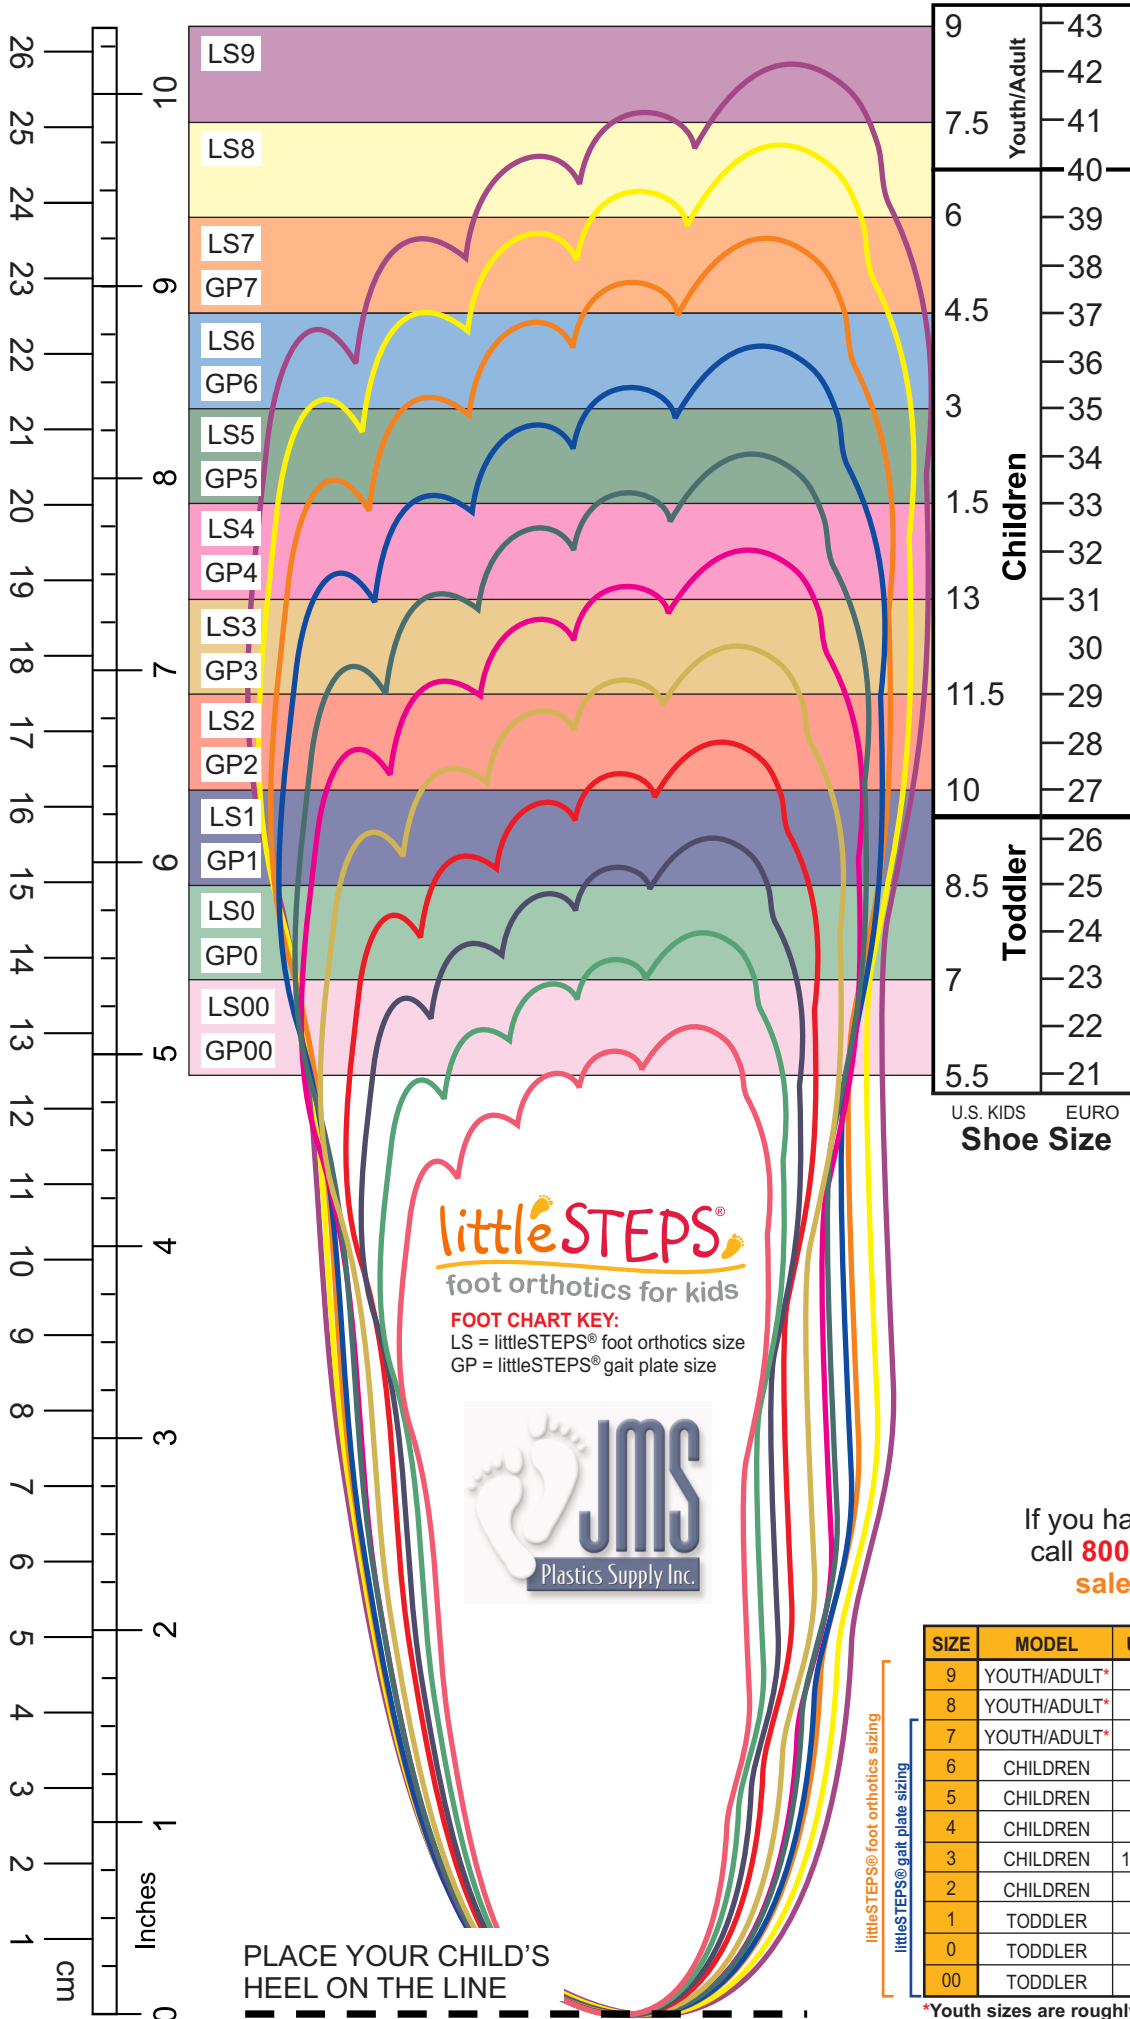

How to Determine your child's Shoe size:

Printing instructions: Be sure to print this document to proper scaling. To do so, chose "print options" and choose "none" in the scaling options. After printing check with a ruler to confirm that the scaling is correct.

Initial Sizing Instructions:

- Have your child step on the paper so that their heel is placed on the dashed line as indicated.
- See what color or shaded zone your child's longest toe falls between and select the appropriate littleSTEPS® orthotic size.
- Be sure to measure both feet as your child's left and right foot sizes may differ.
- Note that children's shoe sizes tend to vary quite a bit between shoe vendors. This chart is meant to be a guide to fitting dimensions for finding the appropriate littleSTEPS® foot orthotic size for your child. littleSTEPS® foot orthotic sizing may not directly correlate with the actual shoe size your child is wearing, but should be relatively close.
